

BlogNest API

PHASE 01 OF 08 | BRAINSTORMING & IDEATION

Project overview

The BlogNest brief describes a modular blogging CMS API with draft and publishing workflows, role-based access for administrators, editors, authors, and readers, and AI-supported writing. It also covers categories and tags, comment moderation, media metadata, search, validation, and logging.

Project description

A role-aware content API for blog publishing, editorial workflows, categories, comments, media, search, and AI writing assistance.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Blog drafts and publishing
- Editorial roles and approvals
- Categories, tags, and search
- Comments and media metadata

Phase description

Define the user problem, explore ideas, and agree which opportunity is worth solving.

Project-specific phase focus

Explore the needs of writers, editors, administrators, and readers in a publishing workflow.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ List and group solution ideas
- ☐ Prioritize ideas by feasibility and importance
- ☐ Write the customer problem statement
- ☐ Map what the user says, thinks, does, and feels
