

BlogNest API

PHASE 03 OF 08 | PROJECT DESIGN PHASE

Project overview

The BlogNest brief describes a modular blogging CMS API with draft and publishing workflows, role-based access for administrators, editors, authors, and readers, and AI-supported writing. It also covers categories and tags, comment moderation, media metadata, search, validation, and logging.

Project description

A role-aware content API for blog publishing, editorial workflows, categories, comments, media, search, and AI writing assistance.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Blog drafts and publishing
- Editorial roles and approvals
- Categories, tags, and search
- Comments and media metadata

Phase description

Check problem-solution fit and describe the proposed solution and its architecture.

Project-specific phase focus

Model the content lifecycle and the boundaries between editorial and public experiences.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- [] Complete the problem-solution fit canvas
- [] Describe the proposed solution and user value
- [] Diagram the solution architecture
