

BlogNest API

PHASE 08 OF 08 | PROJECT DEMONSTRATION

Project overview

The BlogNest brief describes a modular blogging CMS API with draft and publishing workflows, role-based access for administrators, editors, authors, and readers, and AI-supported writing. It also covers categories and tags, comment moderation, media metadata, search, validation, and logging.

Project description

A role-aware content API for blog publishing, editorial workflows, categories, comments, media, search, and AI writing assistance.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Blog drafts and publishing
- Editorial roles and approvals
- Categories, tags, and search
- Comments and media metadata

Phase description

Plan a clear demonstration, show proposed features, coordinate the team, and explain future growth.

Project-specific phase focus

Demonstrate an editorial flow from draft and review to publishing, then share next steps.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ Plan the demo flow, timing, and responsibilities
- ☐ Verify proposed features are ready to demonstrate
- ☐ Agree team communication and handoffs
- ☐ Document scalability limits and future plans
- ☐ Record each member's demo contribution
